### **REASONS FOR ALLOWANCE**

1. Claims 1, 3-6, and 8-11 are allowed.

1. The following is an examiner's statement of reasons for allowance: The prior art taken either singularly or in combination fails to anticipate or fairly suggest the limitations of the independent claim(s), in such a manner that a rejection under 35 U.S.C. 102 or 103 would be proper. The prior art fails to teach a combination of all the claimed features as presented in claim(s) 1 and 6, wherein the claimed invention comprises, in claims 1 and 6, a mode changeover part configured to switch between an interlock mode in which movement operations of the first movement means and the second movement means are interlocked and an independent mode in which movement operations of the first movement means and the second movement means can be independently controlled, in which the first light receiving part and the first conversion member are moved by the second movement means along the optical axis independently of the movement operation of the first movement means; and when the independent mode is selected by the mode changeover part, the arithmetic part obtains received light position intervals from the first received light signals at the first light receiving part, and the condensing positions of the light fluxes converted by the first conversion member are configured to be adjusted by the second movement means which moves the first light receiving part and the first conversion member on the basis of the obtained intervals independently of the first movement means~ so that the obtained intervals fall within a predetermined interval range, as claimed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue
